Larry;

I wanted to Thank You for once again bringing the NAB Road Show to the Central Valley Engineers, especially for those of us not able to attend the yearly NAB Convention in Las Vegas. As always your presentation was interesting and helpful. Thank You again and to all the Sponsors of the NAB Road Show.

Hello Monica,

Thank you for sending me the cool blue ESE Precision Timing polo shirt that I won at Larry Bloomfield's "A Taste of NAB", which was held in San Francisco on Wednesday, April 27, 2005.

I like the ESE products, and I like my new ESE shirt!

Thanks again,

From: "Floyd Farrar" [farrfl at comcast.net](mailto:farrfl@comcast.net)
Subject: Meeting with old Grad
Date: Sunday, May 08, 2005 11:57 PM

I was able to finally meet up with the inimitable Larry Bloomfield of Rim Hi Class of 1957 fame last Friday up in Burbank. I figured you all would like to see how he looks now. His son is pictured in the second photo. -->

Larry is into old TV and radio nostalgia etc. Do ya remember the test patterns from old TV days? They tracked down the fellow who originally designed the standard TV test pattern back in the late 1930s!

He redrew it for them and it is as original as it can get.

How many remember it? I sure do and it brings back memories of standing in front of the Western Auto store front window with many others of my small community a long time back, waiting for the station to sign on and broadcast the funny thing called TELEVISION (on a very small screen and in black and white)

Cheers And Have a Nice Day :-)

Subject: RE: A note of gratitude:
Date: Sunday, May 08, 2005 9:29 PM

Larry,

Thanks for the email. I was looking for your address and now I have it..

I wanted to let you know that we appreciated your recap of the NAB exhibits. With most of the engineering seminars being scheduled during the limited exhibit hours, and the quantity of the exhibits, we only had time to see about 30% of what was on the floor. Just as last year, most of the products you brought with you to BABES, I missed seeing while I was in Vegas.

Thanks for your annual trip to BABES. I'm looking forward to your visit again next year.

Bill Brooks

[bbrooksi at comcast.net](mailto:bbrooksi@comcast.net)

(Note: BABES is an acronym for Bay Area Broadcast Engineering Society or SBE in the San Francisco area)

CC: "Pappas, Harry J." [HJP at PappasTV.com](mailto:HJP@PappasTV.com)

Hi Larry,

Your presence this year was refreshing as usual. I cannot tell you how much I appreciate this yearly overview of technology. What a great way to not only review the show but an excellent forum for new technology. Our planned implementation of beta testing the holographic storage

you introduced to us last year is an example of how this process is successful and worth valuable time.

If there are any sponsors that support you and need to hear this please feel free to forward this message.

Take care and have a great year.

James Ocon
Chief Engineer, Pappas Telecasting of Nevada

Dear Larry,

It was nice to have a taste of the NAB Road-Show and I sure gained knowledge from your presentation. Thank you!

What a surprise that I am one of those door prize winners, except that I am no student, as posted on the website. I graduated too long time ago, took a couple of courses later, but I worked and I want to work. My title is not so big a thing probably, but I do want it to be corrected, you may leave it blank or put on 'housewife', or remove me from the winner list.

Thank you!

Great day! Liping Ai

BY E-MAIL [LARRY at TECH-NOTES.TV](mailto:LARRY@TECH-NOTES.TV)

May 10. 2005

Mr. Larry Bloomfield Tech-Notes 1980 25th Street Florence, Oregon 97439

Dear Larry:

Thank you for bringing your "Taste of NAB Road Show" to the April 27 joint meeting of SBE Chapter 40 and the Bay Area Broadcast Engineers Society (BABES). This makes three years in a row, so I think that we have started a "tradition." Your presentation, and those of Paul Turner and John Hall of Omneon Video Networks, Steve Krant of Sundance Digital, and Robert Saint John of Lagos Corporation, were all well received. The InPhase Technologies holographic storage system looks to be awesome in its storage capacity. The AJA Video Systems converter products were neat, especially the HD-C2 SDI digital to serial analog converter. Squeezing that capability into a package that will easily fit into a coat pocket is pretty impressive.

The Henry Engineering Matchbox HD and Multiphones Guest Pod were neat, too.

I am enclosing a pdf of the meeting sign-up sheet, for your information. I look forward to a repeat of your Road Show next year.

Sincerely,
Dane E. Ericksen

To: Broadcast Radio Mailing List [broadcast at radiolists.net](mailto:broadcast@radiolists.net)

Hi All,

I attended the NAB Road Show today at the SBE Chapter 9 meeting at AVR in Phoenix. I was impressed – not only were there video and TV manufacturers represented, but there was some fantastic audio gear there as well.

If you have a chance to attend (there has to be like 70 more stops this year!), you'll definitely gain from it (no broadcast pun intended).

Regards,

Mark Shander Columnist, Radio Guide BAE, Verizon Wireless

Date: Fri, 13 May 2005 15:45:47 -0600 (MDT)

Hi Larry!

Thanx again for a most interesting Road Show! Since I don't get to go to the NAB, this's the next best thing.

I'd mentioned to you about 1 of the ways I've using the AJA converters. I've been using them extensively to covert the component input/output our Beta machines to composite input/output. By doing this, I'm able to easily set up and match video levels of both the component and composite inputs/outputs (see attached). It beats former way of doing it!

Anyway, all the best on your road show. I look forward to seeing more of the same in the future.

From: Ernie Hartt ehartt@ktsm.com
Date: Tue, 17 May 2005 10:57:03 -0600

Hello Larry;

We hope that you have a safe trip to Oklahoma for your next show. Thank you again for making the trip to EL Paso so that the members of SBE chapter #38 could get a chance to see all the fine products that were in your bag of tricks. I collected a lot of information from AJA, Burst Electronics, ESE, Henry Engineering, InPhase, Larcan, Leader, Leitch, Ligos, Riedel and Sundance Digital and it will help to keep me up to date on some of the latest products on the market. I was hoping for a better turnout, but the ones that showed up are now a little wiser and better for it. I will look forward to your next show.

As posted: <http://www.sbe34.org/>

SBE Chapter 34 - New Mexico

A Taste of NAB

Many, many thanks to Larry Bloomfield for bringing his Taste of NAB show to Albuquerque for the second year in a row! Once again it was an excellent event that featured several interesting products. In addition to Larry, three sales people from the various vendors showed up to help describe their products. We were also graced with a visit from Corrales' own Bill Kent from [Burst Electronics](#) (the *other* Burst!).

Brad Torr of [Leitch](#) showcased many of their NEO and 6800+ products, along with the brand new X75. Scott Nix provided an overview of [Sundance Digital's](#) Titan automation, Fast Break automation and their various other products. [Omneon's](#) server architecture was the focus of Dwayne Brady's presentation.

Bill Kent, who has donated an LG-1 Plus logo generator as a door prize, discussed Burst's newest product unveiled at NAB: the Pixie-FS, an 8-bit "throw-down" style frame synchronizer. This impressive device is barely larger than a deck of cards and includes a full proc amp.

Larry provided excellent information about the rest of the equipment on the show.

Mr. Bloomfield certainly deserves kudos for his vision. Last year Larry brought along a product that was still in technology demonstration phase. This product, a holographic data storage device, has the promise to hold multiple terabytes of information on a disc that is just a little bit larger than a typical DVD. He was absolutely certain that this would be a big thing — and this year there was quite a buzz about this technology at NAB.

Thom Johnson of [Burst Communications](#) provided most of our lunch, and at the last minute Brad Torr of Leitch was pressed into service to provide lunch for a few extra attendees. Thank you both!

To see where the show is going next, where Larry has been and just generally learn more about the show, visit [The Taste of NAB site](#).

From: "Peter M Harrison" peter at phmusic.co.uk

Date: Fri, 20 May 2005 11:59:10 +0100

Larry,

Many thanks for your presentation last evening. Although part of this industry for the last 30 years, I only moved back to regular employment (with Calrec) relatively recently, having spent a number of years as an independent engineer and consultant and writer for UK based broadcast and audio magazines.

I therefore have some feeling for the profession we share and having spent all of my time this year at NAB in Calrec discussions; it was helpful to see some of the other items. Of course, if I can ever provide you with any material on TV digital audio desks, I will be more than happy to do so.

Being an alien who is only in the USA for half of every month, I have to confess to not being an SBE member but I can boast full membership of the UK's Institute of Broadcast Sound!

All best regards,

Peter M Harrison

Subject: Road Show
From: [dehogg at ksu.edu](mailto:dehogg@ksu.edu)
Date: Wed, 25 May 2005 10:28:25 -0500

Thank you for putting on the Road Show. I appreciated the plug you give for SBE and the need for furthering ones education. No matter how you get your education it is still important in the pursuit of bigger and better things. One can always learn something in a presentation whether or not the material is directly relevant to their position or not. Sometimes it's the ideas that spring out of something different that makes getting involved with organizations such as SBE a relevant effort.

I spent 17 years as an instructor at an electronics trade school before deciding to go into the industry and had taught many of those at the meeting the other night in Wichita.

Hey Larry,

Thanks for your effort on the "Taste of NAB" program. Very interesting. You held my attention even though I kept reminding myself that I had to get up at 4:00 am the next day.

It was especially interesting that you're such a prolific writer. I recently submitted an article to Broadcast Engineering (in an effort to generate renewal points for my SBE certification) but was rejected because they have a tight editorial calendar and plenty of material. So I have submitted the article to TV Technology magazine instead, although they haven't indicated whether or not they're interested.

See you next year.

From: "Jim D. Wynn" [jwynn at kvue.com](mailto:jwynn@kvue.com)
Date: Tue, 31 May 2005 15:48:02 -0500

Larry,

I'd like to thank you (and your grandson!) for bringing "A Taste of NAB" to SBE Chapter 79 in Austin. It provides an invaluable look at some of the new technology available to our industry. We, as television engineers, desperately need to learn about it so that we can intelligently cope with it when and if it comes in the door.

It has been several years since I've had a chance to attend NAB. You brought products and information from several manufacturers that I had never seen before. Omneon, Riedel and InPhase were new to me and it is realistic to believe that I might need to know about any or all them in the foreseeable future. I'd also like to thank all the other manufacturers who participate. Though I already use some of their products it's always good to see what's new. You really provide a valuable service and I'm glad you were able to put us onto your itinerary.

And, thanks for the door prize!

From: Broadcast Engineering RF Update
June 3, 2005

[Taste of NAB2005 tour hits the road](#)

Jun 3, 2005 8:00 AM, RF Update e-newsletter

LARCAN and several other companies are sponsoring a road show to provide broadcast consultants, engineers and technicians with a unique educational opportunity.

The road show will visit more than 70 venues set up by local SBE Chapters before concluding

the Taste of NAB 2005 road show Oct. 26.

As part of its exhibit, the company will introduce broadcasters to the new LARCAN PLUS Series for digital LPTV applications, which debuted at NAB2005.

For dates and venues visit www.tech-notes.tv/2005/2005-1.htm.

Subject: Recent visit to SBE Chapter 67 in Dallas.

From: "Cliff Erickson" [erickson at wwdb.org](mailto:erickson@wwdb.org)

Date: Tue, 7 Jun 2005 16:01:03 -0500

Larry

I really enjoyed your presentation to our SBE chapter Thursday before Memorial Day. I hope your stay over the weekend was pleasant. How was playing tourist over the holiday? What kind of adventures did you have?

Thank you again.

It was an additional treat that door prizes were awarded. Generally, my name rarely is drawn for such fun. The fun for the evening increased when you selected me for the Media One DVD/CD Burning software. Thanks again for picking me to win anything, even more so for the substantial software prize.

This afternoon on returning from the job search, UPS left a box on the door step. Made the day more fun because it is the Media One Software. I will have more pleasure creating slide shows of our new (8 months old) grandbaby. I am saving the software as additional incentive to find a job. I get to play after finding work. So that means there will be another batch of smiles and fun in the future.

Thanks again for 1) being here, 2) sharing a great and worthwhile program, 3) having door prizes, 4) presenting me with a door prize, 5) delivering the door prize, 6) the fun I will have with it in the future.

There you have it, 6 kinds of fun and joy you brought to Dallas.

Best regards,
Cliff Erickson

Subject: Chapter 3 SBE June News

THIS MONTH
(Things not about the Road Show were edited)

Our program, The Road Show 2005, a Taste of NAB, was conducted by Larry Bloomfield. It was the 4th year for the show. Venues for the show started at 24, then grew to 36, with 48 showings last year; there are 73 bookings for this year. See www.tech-notes.com for the itinerary and details. Larry asked that engineers present at our meeting who attended NAB recall what impressed them most at Las Vegas. Several people responded, including Larry who noted: the development of the P2 recorder w/solid state memory by Panasonic, which came out of Iraq where fine sand ate hard drives and moving magnetic media; Z Tech recorders for signal strength plots, using a USB port for rapid transfer of information to a laptop; and Symmetrics audio delay for lip synch on DTV ENG.

Larry is a former teacher, a Broadcast Engineer, publisher, writer, and consultant, among other things. Why the road show? You must keep up with industry changes, or someone who does will take your place. This is where the educator in Larry comes forth. He is a strong advocate of SBE to fill the role of continuing education for engineers, but also urges them to seek out and participate in IEEE, AES, SMPTE and other engineering organizations. Good information is available on their websites. For pure fun, try www.oitp.org - The Order of the Iron Test Pattern, of which Larry holds the title of "Sagacious Pixel" as its leader.

Sponsors, who provided products for Larry to showcase, were:

- **Larcan:** 1-25W FM LP transmitters, in 1RU, frequency agile. Same chassis is used for translator;
- **Sundance Digital**, represented by Kurt Caruthers, with Sundance automation software (used at Castle Rock). Media management has been added to the machine control, and it is fully SNMP compatible. News Link, a new standalone product, enabling one TD to run an entire news broadcast, and Seeker, an excellent search engine and multi-facility link made for today's consolidated operations;
- **Henry Engineering**, Match Box, Patch Box, Multi Phone for digital phone bridge, Transient power clamps, and many other useful widgets;
- **Ligos**, MPEG II software based encoders from NTSC video to SDTV;
- **AJA**, video conversion bricks for DTV to STV, RGB, or Composite, enabling you to continue use of your precise NTSC monitors; Sony LCD Monitors with two VGA inputs;
- **Leader Instruments**, 4 channel rasterized feeds to your computer monitors. Has flash card BMP capture of waveforms to send to your vendor to aid in problem solving, and stores your individual settings in a cache;
- **ESE**, Audio/video analog DA's, time code generators, readers and clocks;
- **Omneon RAID3** Digital Servers, with intermix of different capacity hard drives, if needed.
- **Leitch** 16x10 Switchers, Routers with transitions on switching, Frame Sync, up/down conversions;
- **In-Phase**, superior to Blu-Ray optical write, working on 17 Terabyte recording on non-rotating Media using several levels or depths of holographic recording. WORM devices now, but should be R/W by 2007 - consider for archiving!
- **Riedel**, Digital Intercom System with 48KB sample rate. Many use it to digitize mikes! Four channels on rack gear, two channels on belt packs.

Check at www.Tech-Notes.TV for more information on The Road Show 2005, links to its sponsors and for information on end of show door prize winners. It was a grand evening, topped off with drawings for several door prizes provided by the sponsors! Our thanks to Larry Bloomfield, the sponsors of the Roadshow, and to Chuck Myers, our host!

From: "Peter Hoekzema" [engineering at kveo.com](mailto:engineering@kveo.com)

Date: Wed, 8 Jun 2005 08:36:00 -0500

Larry:

Thank you for making the effort to come down with the road show. I am sorry that our chapter made such a poor showing, especially since it has one of the best records of any SBE chapter for attendance.

The equipment and technology were both interesting and informative. Since moving to the lower Rio Grande Valley I have had fewer chances to go to the NAB convention and having your mini road show was an important feature for my expanded knowledge.

Thank you again.

Subject: Thank You!
From: Paul Rino [thealbumman at yahoo.com](mailto:thealbumman@yahoo.com)
Date: Wed, 15 Jun 2005 06:41:29 -0700 (PDT)

Thank you again Larry for an excellent show in Shreveport. It was a pleasure meeting and listening to you last night. Although I am not a member, I am an Electronics Tech, former member of IEEE, and have worked as PD/MD and behind the mic at many radio stations around Louisiana off and on during the past 25 years. Currently I am the Regional PC/LAN Analyst for BancorpSouth Bank and responsible for servicing our locations in a 120 mile radius of Shreveport. Seeing only a portion of this hi-tech equipment available today sure gives me the desire to return to the broadcast industry again.

I look forward to the next road show again!

Sincerely,
Paul Rino

Subject: NAB Road Show Meeting S'port, La.
From: robert abraham [techbrain57 at yahoo.com](mailto:techbrain57@yahoo.com)
Date: Thu, 16 Jun 2005 22:00:14 -0700 (PDT)

Hi Larry,

Nice to meet you and sure enjoyed the meeting and products on display. My friend Paul who came with me also enjoyed the show. I take care of 9 radio stations as a contract engineer and most of the time have my hands full. However, I always enjoy meeting other engineers in the broadcast field. The SBE has been a good source of keeping in touch with the field of broadcast engineering and all the new things that come with it. I can appreciate attending a show such as this to see first hand new products and meet other engineers. Sure would invite you to come again and again thanks for a great presentation.

Subject: A Taste of NAB Roadshow
From: "Steve Portier" [sportier at selu.edu](mailto:sportier@selu.edu)
Date: Tue, 21 Jun 2005 08:26:53 -0500

Dear Larry,

I attended the New Orleans SBE Meeting featuring my favorite Program so far for the past two years "A Taste of NAB" yesterday, June 20th, 2005.

This type program at our Chapter Meeting is just the kind of thing that boosts member attendance, provides a valuable service for many of us engineers that can't either afford the time or resources to actually attend the NAB in Las Vegas each year. I hope this continues each year and you can continue to bring the great products that makes our jobs easier and helps our stations broadcast better.

Having the opportunity to view and actually touch the various products that your sponsors provide is so much better than looking at a picture in a magazine or on a website. Plus an actual engineer, in person explaining each item and taking questions is all just wonderful. Please keep it coming.

Subject: Thanks for the presentation
From: "Danny Miller" [DannyMiller at i-55.com](mailto:DannyMiller@i-55.com)
Date: Tue, 21 Jun 2005 10:35:19 -0500

Larry,

It's very difficult to make the NAB show each year. We are fortunate to be able to see highlights from the show professionally presented right in our backyard. Your Taste of The NAB Road Show presentation was both informative and entertaining. It's a bonus to have your breakdown down of the information regarding the products and their applications as well as immediate direct access via phone calls to the various manufacturers due to your clout.

Thank you for including New Orleans in your tour again this year and I'm looking forward to next year. Please call me if there is anything I can do for you.

Hi, Larry:

I enjoyed very much your presentation yesterday in N.O. (*New Orleans*) retired now, but still like to attend the meetings to keep up a bit with what is going on. I am an SBE life member with lifetime CPBE certification, so I don't need to worry about making points for recertification. You have an impressive grip of what you are presenting and an excellent hold on the group's attention. My wife and I escaped from New Orleans 5 years ago to Picayune, MS where we enjoy the quiet life in Lake David Estates, where each lot is 2 acres of pine, oak and magnolia trees. I look forward to seeing your Road Show next year.

Larry,

It was nice meeting you yesterday and thanks for not picking on my manager to bad. (*see message #60 above*). I wanted to sit on the front row, but being nice I sat half way back and not knowing it really sat Russell dead center front row!

I turned my seat to save my neck and threw an iceberg at you (only because the desk top was hinged) (*a very large ice cube fell on the floor and that is what Wiely is referring to*)

I wanted to input that I think the Sea of Japan (wherever that is) is the lightning capitol of the world- from Tampa to roughly Jacksonville in US.

I totally agree on knots – a professor that did grounding consulting/seminars was pushing that until UL got after him. I like running thru metal conduit and all that. (not ground wires of course and no sharp bends in ground wires) I can tell you are a grounding choir guy J

Anyway it is great you came to show and tell us folks in the field here that could not visit the NAB show about some of the technology we are missing. I was glad my boss was there when you went over the “you need training” speech.

Again thanks to all the vendors that support you and the road show. It is of much value to us,

Wiely Boswell

Subject: great show last night!
Date: Tuesday, June 28, 2005 10:46 AM

Hello Larry.

I was intrigued as to what you presented last night at the Orlando SBE42 meeting. I'm glad Lou set up the event, I really enjoyed it. The topics you covered were excellent. I just want to encourage you to keep up the Road Show, it was assume.

On a personal note, I would like to pass along a compliment to your grandson as well. You may or may not remember me, but I was one of the volunteers that helped load up your van at the end of the evening. I was impressed with your 16 year old son as to his ability to instruct a bunch of Engineers into loading up your vehicle. I was especially impressed with his manners. Why, you ask? When we were done with the loading, he made it a point to get my attention as I was walking away, to come over to me, shake my hand, and thanked me for helping out. Having a 16 year old son of my own, I can appreciate the gesture.

Once again, keep up the good work, education is so important, as you demonstrated.

Sincerely,

David Palmeira, CBT, CBNT

Larry,

I wanted to personally thank you for coming to Orlando, Florida and giving us a "taste" of what is going on in the industry. I really enjoyed your presentation, however, if I may be so presumptuous as to add a little advice. I realize you're a television guy but you should try to involve us radio guys in your presentation. I must admit you gave it your best effort and I know your presentation is driven by your sponsors and contacts in television. None the less, it was an educational presentation and I always appreciate learning more about engineering even when it doesn't really involve radio. I will be reading your articles and visiting your web site, so I hope you don't mind me keeping in touch.

Subject: Thank you for bringing The Road Show to Orlando
From: "Fluker, Steve (CBI-Orlando Radio)" [Steve.Fluker at cox.com](mailto:Steve.Fluker@cox.com)
Date: Tue, 28 Jun 2005 10:00:19 -0400

Larry,

Thank you very much for bringing the road show to our SBE meeting last night here in Orlando. I applaud what you are doing! As I told you last night, I'm fortunate to be with one of the companies that expects all of it's engineers, and in many cases not only the top market engineer but even encouraging the next in command to go to both the NAB and RNAB conventions. We hold corporate engineering meetings at both shows every year. I guess I've fallen into the same trap as you in that I've been vocal about our meetings, and that somehow got me elected to running them. Our corporate VP of engineering stresses how important it is for all of us to not only go to see the exhibits, but to also attend the technical seminars as well. You are right, without proper training or the chance to keep up with the latest technology, we might as well hang our degrees and certifications in the bathroom stalls. I've been honored to have been asked to be a presenter at both the last NAB Radio Show in San Diego, and the recent NAB show in Vegas this past April. Since most of the engineers in this market were not

able to go to the show, I did as you are and brought my presentation back to our local SBE meeting. I've been asked if I would consider taking it to the Tampa meeting soon as well, which I would be honored to do.

My only suggestion on the road show is that I would like to see a better mix of radio and TV products. Now I spent eight years in TV so I enjoy trying to keep up with their technology, but I know there were several there who have only been in radio in their careers. I realize this is up to the manufacturers who are supporting your show but maybe if they knew the value to us, they might step up to the plate too. You might talk to vendors to see what they can do for you. We have the Broadcasters General Store just up the street in Ocala and I'm sure they would have brought equipment to the meeting last night. I understand your concern about not turning it into a sales pitch though. The General Store though has been an incredible resource for our meetings.

Again, thank you for bringing the show to us. What a great value to our group! I hope the manufacturers will continue to support this effort.

(This e-mail was edited to delete things that may be embarrassing to the Tampa SBE chapter. If you wish to see the complete e-mail, contact Bob Hardie.)

Larry,

Please accept my apologies for the low turn out. We are having a meeting to discuss keeping it from happening in the future since we know what happened and how to correct it.

Our Email server was locked out and was not delivering emails to the members properly. You got some of the emails, as did I, but there were many who didn't. So we thought it was working. Several people have contacted me saying they heard about the show and missed it due to not realizing it was that night. We ALWAYS send out several reminders. All four of

my reminders came back undelivered, however, I didn't see them until it was too late to correct the problem.

Your show just happened to fall when this occurred, which is very unfortunate for you and all the work you put into putting the show on. I assure you that this will not happen again. (It hasn't happened before to my knowledge either).

We look forward to your return and again we thank you very much for your dedication to the SBE and its growth.

Subject: seduling some SBE meetings
From: Gary Krohe [gkrohe at krohe.com](mailto:gkrohe@krohe.com)
Date: Tue, 05 Jul 2005 14:49:31 -0500
CC: [mkinnan at taketwo.tv](mailto:mkinnan@taketwo.tv), [kcox at susqkc.com](mailto:kcox@susqkc.com)

Hi Larry,

Firstly, I wanted to thank you for the absolutely great presentation you gave to the Kansas SBE Chapter #3 in Wichita last May. We all appreciate the time and effort you put into this. The reason for my email is to schedule the same presentation for 2006 and 2007 in May for our chapter. The Kansas chapter usually meets the second Tuesday of the month in the evenings which would make the 2006 meeting on 5/9/06 and the 2007 meeting on 5/8/07. Given the great lead time we have on these meetings we can work around your schedule too. Since our chapter covers the entire state we could hold the meeting in Topeka, Wichita or perhaps at some other location convenient for you.

An alternate idea here may be to see if we can work a joint meeting with the Kansas City chapter (#59) some place close for them too (perhaps Lawrence). However, I've not contacted them directly on this yet.....(but have cc'd them in this email).

I look forward to seeing next year's show.

Gary Krohe
Vice Chairman/Program chairman
SBE Chapt #3

(Note: This individual posed a question on one of the many internet forums asking if it would be worth or a waste of his time to travel to and attend the Road Show. Several exchanges and responses transpired from others than me; all with various degrees of positive comment. From that point on, the interchanges became very negative, derogatory and in some cases personally demeaning - even though the individual has never attended one of our events or has never met me. In all fairness, I have promised to post all comments received – positive or negative – about the Road Show, editing only personal things. I do have to say, this is the very first negative report I've received.)

Subject: A review of the Roadshow

From: Ron Radetzki [radio99ron at yahoo.com](mailto:radio99ron@yahoo.com)

Date: Tue, 5 Jul 2005 18:52:18 -0700 (PDT)

To: [broadcast at radiolists.net](mailto:broadcast@radiolists.net) , [radio-tech at broadcast.net](mailto:radio-tech@broadcast.net)

CC: [larry at tech-notes.tv](mailto:larry@tech-notes.tv)

The responses relating to my initial inquiry into Larry Bloomfield's Taste of NAB Roadshow did not convince me to travel to the closest location. Some said that it was my loss.

I just watched the streamed presentation of Bloomfield's "presentation" to the Miami SBE chapter. First, I want to thank FIU for streaming that program. You provided a great service. Unfortunately, I have lost more than two hours of my life to sit through the webcast.

Because these lists are forums for the open exchange of information, I would like to share my observations about this "educational" event.

The presentation included 15 minutes about Larry's life story, 20 minutes for an overview of the various professional organizations (SBE, SMPTE, AES), 5 minutes on the Order of the Iron Test Pattern, 3 minutes on the proliferation of translators, and about 100 minutes for the tables of equipment.

During the presentation I learned the following:

- I learned about Larry's life history.
- Larry once wrote for Broadcast Engineering.
- Larry likes to read in the toilet, and according to him broadcast engineers only have time to read in the toilet.
- He knows Connie Chung and Brent Musberger.
- Larry knows basic electronics.
- Larry taught in Guam.
- Staying abreast of technology is important. (Mr. Obvious)
- Larry was displeased with the Portland, OR, chapter so he formed the Eugene, OR, chapter.
- Your wife says that you should keep your mouth shut.
- The Eugene chapter is seeing some success.

- If you're not an SBE member, Larry will guilt you or shame you into joining.
- Larry met Admiral Nimitz.
- Commercial broadcasting's sole purpose is to deliver households to advertisers. (How obvious!)
- An EMP surge will take out electrical equipment. (more of the obvious)
- Sundance doesn't send CDs with its catalog to the roadshow. Sundance has a modern phone system that will route service calls to the next available person.
- Larry does not have the software to change the time on his ESE clock. This tells me that ESE equipment is hard to use because Larry, by his own admission, is not stupid.
- Larry has bought a lot of ESE distribution amps. (That's not a sales pitch?)
- Connie Chung is a sweet lady.

I did not learn anything about technology during this presentation. I saw descriptions of equipment. If you consider walking the show floor at a convention an educational experience, I question your definition of educational.

Larry says that this program is not a sales pitch. He doesn't mention prices, but he sure pushes the products he shows. The entire presentation was about how great the products being shown are.

I never heard, "Let's talk about proper distribution of analog and digital signals." Instead, I heard, "Let's talk about ESE. Take your picture with your ESE equipment and you will get a polo shirt. ESE makes excellent clocks."

About Sundance Digital: "I don't know of a better automation system." That sounds like a sales pitch to me.

"Omneon is an amazing company. I would buy one of their servers if I were looking to buy one." How is this not a sales pitch?

About In Phase Technologies: "The greatest thing since the cat's pajamas." Superlative statements such as this reek of sales pitch to me. You could not explain how it actually works, saying that you could not get past chapter one of the book. It would have been nice for you to learn the technology so that you could educate me during your "educational" program.

Teach me about measuring and verifying DTV signals, don't tell me that the Leader unit is really great, that Leader sells products and how the people that work for Leader are really nice. Teach me about holographic storage technology, don't tell me that you can't comprehend it.

I received a full-on pitch for the Tektronix equipment. Granted, the presentation was turned over to the Tektronix sales rep. How is this not a sales pitch?

Larry states that managers should send at least one person to the conventions, and that managers who do not are stupid. Why is he telling this to the engineers? Tell it to the managers.

Mr Bloomfield, you provided a great deal of information. Some was general info, some was marketing. (All of it was already know to me -- because I read the trade publications (but not when I'm sitting on the toilet) and attend conventions.) Overall, it's too much. There is no prime focus that I could see. In general, much of what you say seemed to wander. May I suggest that you find a way to tie everything to the goal of the presentation. You state that the goal is education. I disagree. I saw a sales pitch without prices.

You have sponsors to pay your costs to present this program. With any presentation there is a need to pay the piper, but do that separately from the education content. In this case, there was not educational content. It was all sales.

Ron

Sell on Yahoo! Auctions - No fees. Bid on great items.

(There were no less than a dozen responses to this post on the two lists he post it to with varying degrees of positive support for our efforts. No one was in agreement with him! You be the judge)

Hey Larry,

I really enjoyed the show, being one of the fundless institutions who had to skip NAB this year, I and the employees of mine whom I brought learned and saw a lot we would not have known about otherwise. Your grandson, Tom is a real fine fellow too, good to get youngsters out doing something in the real world. Thanks, will not miss it next year.

Hello Larry,

I'm sort of new to the radio industry, but I am enjoying the job. Last night was the first meeting I have attended with SBE. I am joining the SBE and want to let you know that I thought your presentation was excellent. You demonstrated things quite clearly and with great wisdom. I am glad to have had the opportunity to meet you and I would like you to come back again in the future. I am sure traveling around is exhausting for you but the knowledge you shared with us was priceless.

I am sorry I did not get to stay longer and chat with you personally as my ride was leaving to travel back to Ft. Pierce where we live and work. Only an hour or so to drive.

Again, many thanks for the look at all the products and the free CDs. I hope to see you, maybe at the next trade show or maybe a SBE meeting.

Sincerely,

Date: Sat, 09 Jul 2005 19:05:27 -0400

Hello Larry,

I want to take this time to thank you for the 2005 Taste of the N.A.B. road Show that you brought to West Palm Beach and Chapter 88 of the S.B.E. We enjoyed seeing you at the EOC this year. There were several members that are very hard to get to come out and many of those tough to find guys came to the meeting. We all enjoy your stories and the facts on many new items that debut at the show but we are not able to see first hand. It is great when your sponsors accompany you on the tour. They bring a factory presence with them and sometimes they usually answer questions.

Each year the show changes a bit but the information that you bring is always great. We look forward to you bringing the show next year. Since we have such a wide variety of engineering types in our chapter, it is nice that the show brings a diversity of equipment for us to see. You are always knowledgeable and it is nice that sponsors join you mid tour. This new information that you bring is a sign that you are supported in your work.

Congratulations on the award from the S.B.E. It confirms the national support that I hope you feel from the local chapters.

Gary A. Minker
Chairman
West Palm Beach

Hi Larry,

I just wanted to say how much I enjoyed last night's show and I only wish we could have more of them down here! South Florida almost seems like they're asleep at the wheel and your shows are so full of information & excitement that it's just "what the doctor ordered"! I'm the guy who wore the suit and it's my uniform of the day so to speak. It helps me maintain a level of professionalism my competition lost long ago! After all, I was in the Navy for 8 years and got used to always being groomed and maintain an "a jay, squared away" look. Whatever it takes to get any kind of edge I always say. Plus, to improvise, adapt & overcome is my motto so irregardless of how "slow" things may seem, I'm optimistic & plan my strategies accordingly. And your seminar is extremely useful in helping me achieve my goal of winning deals & forming relationships with my vast customer base.

I hope to join you again tonight in West Palm, so I'll see you if I make it. If I can't for whatever reason, I wanted to thank you for the opportunity and it was a pleasure seeing you and count me in for next year!

Regards,
Joe

I would personally like to take this opportunity to thank you for making the trip again this year. Most SBE chapters do not have a lot to look forward to each year. Your Taste of NAB is refreshing and something for them all to look forward to.

I would personally like to challenge all vendors and manufacturers to participate in your show and to become more aggressive showing even more interest by coming and setting up mini education seminars that will spin off and feed the SBE Chapters year long.

Your efforts are growing momentum and filling a great need. Those who criticize should be more conscious of the over all need, direction and impetus this is and has created.

We here in Miami look forward to next year with you.

From: "R. Mark Ramey" [mrfilm at earthlink.net](mailto:mrfilm@earthlink.net)

Date: Friday, July 15, 2005 10:49 AM

Larry,

Thanks so much for bringing the Road Show to Shop at Home.

As a Videographer I wouldn't the have to opportunity to use much of the equipment, directly yet I found it interesting.

Having been an editor early in my career (and I still edit some of my own projects at home on Final Cut) I found the transcoders, and storage most interesting and the audio and surge protection are also important items.

The anything in-anything out audio boxes are something I could have used on many a shoot, especially when getting a house feed. Do they make any with isolation transformers built in I wonder?

The main thing I'd love to see would be more field production gear: cameras, mics, etc. . . although I doubt space would permit.

I really had hoped that you might have something like the Panasonic HVX-200 HD/SD P2 camcorder or Sony Z1U HDV camcorder, being 4 - 10 lb. units.

The Tektronix Rasterizer is something I wish I could have on every field shoot.

Thanks again.

MR

Subject: Thanks!

From: EOSutton at aol.com

Date: Tue, 19 Jul 2005 09:21:47 EDT

Dear Larry:

I was certainly glad that you could bring 'The Road Show' to us again this year! I really enjoyed seeing the new products, as well as hearing you extol the virtues of each product.

I wish that the various product manufacturers could be the proverbial 'fly on the wall' to hear you comment on their equipment! You certainly represent them well. As a matter of fact, I don't see that level of enthusiasm from their own National Sales/Marketing Managers.

My only suggestion to improve the show: Try to get more of the 'Cool Stuff' products integrated into 'The Road Show.' Many of us are really intrigued by the trade articles and would like to see and feel the products without the hype.

I am glad that you stopped, and hope that you will include us next year!

Subject: Taste of NAB Road Show - Columbia, SC

From: "Trent Muldrow" [tmuldrow at innercitysc.com](mailto:tmuldrow@innercitysc.com)

Date: Thu, 21 Jul 2005 16:19:05 -0400

Larry, first I wanted to thank you for swinging through Columbia, SC for your taste of NAB road show. I wholeheartedly agree with your thoughts on sending engineers to NAB and unfortunately it is a hard sell to management so your road show is great for those of us that aren't quite willing to spend our own money to get out to Las Vegas. I have also wanted to become involved in SBE, but our closest semi-active chapter is up in Charlotte which is a bit of a drive if they meet during the day.

Anyways, my only gripe is that there wasn't much radio equipment represented within your things. With IBOC being such a new technology and everyone jumping all over that, it

seems like something that should definitely be covered, but on the other hand everyone isn't only interested in IBOC. I'd also be interested in some more of the everyday type equipment that may be newer, but no one knows about that accomplishes common tasks. Henry boxes are a perfect example. Everyone is familiar with Henry boxes, but everyone may not know about NEWER Henry boxes.

I'm still waiting on a remote broadcast box that will use broadband connections to connect back to the station for broadcast quality audio. Seems like a no brainer to me, but I haven't found one yet. Or better yet an all in one solution.... POTS, ISDN, Wireless (GSM and 802.11), and broadband. That would be nice.

But I digress.... Thanks again for coming to Columbia. It was very informative and entertaining and well worth the time.

From: "Mark Crumpton" [mcrumpton at innercitysc.com](mailto:mcrumpton@innercitysc.com)
Date: Mon, 25 Jul 2005 11:33:18 -0400

Hi Larry,

Great event! I appreciate this because like many engineers I don't have the opportunity to go to NAB. I must say that as a Radio engineer I was VERY disappointed with the lack of Radio broadcast information and equipment. I must inform you, that this, your largest turn out would have drawn 10+ more engineers if there were more relevance to radio engineering. I often hear from other local radio engineers that they don't attend many events because they are "geared toward T.V." Although I personally don't let this keep myself and my staff from the opportunity to learn I do understand the lack of interest. I can't understand the lack of radio related information with the staggering ratio of radio stations to T.V. stations. Sorry to rant...I hope to see you back next year with some added radio stuff. Thanks to Henry Engineering for their participation ... great to see some of their products I wasn't aware of.

Thanks again Larry

Date: Mon, 25 Jul 2005 23:20:53 -0400

Hello Larry, Thanks for making the Road Show, A taste of NAB 2005 a reality. I have not been able to attend NAB since 2002 due to my schedule and enjoy your presentation of the products you represent. Hopefully the show will continue for years to come. It is one of the more interesting SBE meetings of the summer.

Best regards and 73 from Edgar Payne N3HWU.

Date: Thu, 28 Jul 2005 09:49:52 -0400

It is we who should be grateful for all your efforts to bring this new technology to us. Many of us are in the trenches, knee deep in solving the problems of those who always attend NAB Las Vegas. It is greatly appreciated by all of us here in the Raleigh-Durham area unable to stop working and go to Las Vegas every year. It may not be a substitute for Vegas, but it is water to a thirsty group. Next year we will try for twice the crowd. Thanks again,

Michael Campbell
Studio Engineer
NC Public Television Network

Subject: The Taste of NAB Road Show 2005

From: Lane Ridenhour L_RIDENH Lane_Ridenhour at uncg.edu

Date: Thu, 28 Jul 2005 16:32:44 -0400

Larry,

I just wanted to take this opportunity to thank you for bringing the Taste of the NAB Roadshow to North Carolina. I saw the presentation in Charlotte. Like many people here in the mid Atlantic, I do not have the opportunity to travel to the West Coast, or even New York, for that matter. Having the roadshow within driving distance was truly a great experience. Seeing and examining a piece of equipment is so much better than just seeing the picture in a magazine.

I look forward to seeing you again next time. Again , many thanks !

Date: Sat, 30 Jul 2005 08:26:40 -0400

Hi Larry;

Yesterday was my first encounter with "A Taste of NAB 2005" and I left convinced that the whole 184 mile roundtrip was worthwhile for me. Your presentations of various manufacturers' products and discussion of practical applications was very thought provoking and I have already identified several applications that answer immediate needs of stations I service. Manufacturer reps are very knowledgeable about their product lines and I've learned to use their expertise in the past but having an experienced, practicing engineer outline real-world solutions and applications just adds a knowledge dimension that I don't usually find a trade shows.

I'm looking forward to future shows and hope that manufacturers and vendors continue to support efforts like yours to put folks like me, who don't generally get to the big shows, a chance to put hands on their products.

Thanks for supporting SBE, good luck and safe journey!

Hi Larry,

Thanks for the presentation on all the equipment. What really caught my attention was the holographic storage device. I've read about it on the web and it was great to see and feel what is in print.

I volunteer running cameras at our church in Lynchburg.

I'm going to start coming to the meetings with Al every other month since radio and rockets were my hobbies bc(before children). 2 of the 3 have graduated so things are settling down some. You have a fine grandson. Hope he picks your brain while he can. Thanks for coming. The chip chart pins are great! I'm going to aggravate our engineer by putting that on the stand instead of the regular chart this Sunday.

Thanks, Jonathan Givens

Date: Monday, August 01, 2005 11:49 PM

Larry:

The Taste of NAB is a wonderful idea. I felt fortunate to be invited, and I'm going to end up buying some of the equipment that was shown.

Your presentation was truly useful: straight talk from an experienced broadcast engineer about the pick of items from the show, without the hype. My only caveat would be that I always hope for more about audio.

I've already expressed my appreciation to my old friend Noel Richardson, who invited me, and I hope you will relay to the manufacturers how important it is for us stay-at-homes to get a taste of NAB.

Charlie Cooper

Larry

Nice job. It is probably very difficult satisfying everyone in that format. The Radio/TV thing is challenge enough. I think our guys benefited from being there. I think key to anything you might do in the future is try to show us/them items that are solving current issues they are facing. I'd limit the amount of items each vendor has to two or three of their best. You could

also split radio and TV specific items into different sessions. Considering everything, this was time well spent for our engineers. Thanks for making it happen.

Date: Fri, 5 Aug 2005 00:34:14 -0500

Larry -

Thanks for the presentation and the door prize! It was an enjoyable evening. (I was very disappointed with the turn out. I expected we would have had a much better showing) I would have liked to chat more,(and helped to load up) but I was in the middle of my shift tonight and had to get back to the station for the 11pm news.

I did want to get some more information, but got sidelined talking to Tony and John afterward. I'll email you with some questions later.

BTW, when you were discussing Chucks' collection of cameras, I wanted to mention he has one of our stations old studio cameras. I thought I knew about all of the cameras we used over the years and was shocked when I saw our call letters on the side of one in his collection. I later determined it was one of a couple remote cameras from the late 50's-early 60's.

Hopefully, you'll get a good night sleep and leave our area refreshed!

Hi Larry,

Thanks for the thanks. It is always a pleasure to attend the Roadshow. I think you do a tremendous job of presenting some of the industry's latest goodies.

Also wanted to mention that I did not receive the Sennheiser Broadcast (grade) Headphones that I won at the 2004 NAB Roadshow that you hosted at the EOC. Thought this would be a good time to mention it, although so much time has gone by. I had bragged about winning them at the time, to the Chief Engineer / Director of Engineering here at WPBF-TV who is also a very supportive member of SBE. I never did mention that they didn't arrive.

Hope all goes well with you in all your ventures and I look forward to seeing you and attending the next NAB Roadshow here in Palm Beach County, Florida.

Thanks again from yet another "Survivor".

Date: Fri, 12 Aug 2005 13:48:31 -0400

Hello Larry,

I'd just like to pass along my thanks for a wonderful and educational Road Show during the SBE Meeting last night. Bottom line: I learned a lot! I was exposed to equipment I had not seen before and learned more about the TV side of broadcasting as well as having hands on exposure to equipment that I will use in upcoming projects.

I was impressed with your ability to answer questions from the attendees and your on-the-spot method of getting the answers by cellphone directly from the manufacturers when you were unsure yourself. Very professional. Your personal hands-on style is a great benefit to those who make the decisions to purchase the equipment their stations need to get the job done.

You are a credit to those who you represent and a nice guy too!

Thanks again!

Larry,

Thanks for your prompt response. I enjoyed your presentation yesterday. Even though I go to NAB each year, there are so many different ways you can go in searching out things, it is so easy to miss some of the really neat and new stuff that can help our daily operations. I hope that you will be able to get more sponsors in the future. This kind of presentation is a valuable tool and is much appreciated. If you get some sponsors to pay the lunch bill (sandwiches and drinks), you would probably get a bigger crowd. Some engineering staff have to take their own time and lunch hour to come to these kind of meetings.

Thanks again for coming.....

Larry Bloomfield
The Taste of NAB

Dear Larry:

Thank you for another fantastic and successful presentation of "The Taste of NAB Road Show 2005". Your hard work and dedication provide an invaluable service to those of us who are unable to attend Las Vegas in April. And unlike Las Vegas, your show is oriented towards the techs who actually work with the equipment. The guys who install, test, and maintain it. I've been going for the last three years of the show, and plan to go to your future shows. Thank you for your hard work and dedication.

Sincerely,

Mike Fitzpatrick

Hope you are feeling better, Larry...that certificate which I won from Clark Wire and Cable will be quite well used.

Although I was there for Radio World (I'm a contributor, BTW) I still enjoyed your take on what was new.

In July, I presented a program on the Marantz PMD-660 & 671 (audio flash card recorders) and was able to glom onto some Neutrik NC3F/MXXX new style two piece connectors (no more greenies) so I could distribute. So thanks to you, chapter One was just a bit more ahead from the power curve on NAB new stuff.

Keep up the good work. If I can be of any help (as a resource, sounding board, etc.) please let me know.

Finally, Larry, thanks for your service in the Navy. I retired from the US Army (active, Guard and Reserve service) with 28 years as a Sergeant 1st Class (E-7). Won't get the pension until I'm 60...but I can't complain.

Date: Thu, 8 Sep 2005 09:29:05 -0400

Larry,

Thanks for your effort in putting on the "Taste of NAB" road show event on in Pittsburgh. I was disappointed by the turnout, but it may have been because it was the day after the Labor Day weekend. I noticed the parking lot was light at the office when I got back. We were able to get the stuff set up and working pretty well in the short time we had.

In these hectic times, education is too often relegated to a back seat by TV station management. I would like to think the engineers at the local TV stations ARE interested, but are discouraged by the lack of local input in engineering.

Your SBE "Educator of the Year" honor is well deserved. Your tireless efforts with the Taste of NAB Road Show are a credit to you and your sponsors who see the value in "grass roots" education and information.

SBE Chapter 20 Vice-Chairman and OITP Admiral,

John J. Humphrey, CPBE

Director, Broadcast Business Development

Subject: Taste of NAB - Thank you

From: George Maier [George at OrionBroadcast.com](mailto:George@OrionBroadcast.com)

Date: Thu, 08 Sep 2005 00:22:23 -0400

Larry:

I realize that I'm behind the curve in getting this to you, but I wanted to let you know that your road show was really well done, and very informative. It's not often that we have an opportunity to see so many interesting products presented in such a way as to impart enough information to create interest, without getting too deep, unless someone asked you to.

I wish you success, and hope that you complete this year's project in good spirits and in good health.

Thanks again for making Boston one of your stops.

Date: Thu, 8 Sep 2005 22:34:22 -0500

Just a note to let you know I really enjoyed your equipment presentation at Wabash Valley Junior College tonight (9-8-05).

Didn't catch that you are a ham until I checked your "card".

You did a very impressive presentation, Larry, and am very glad I was able to attend.

I've retired from Electronics Research, Inc. in Chandler, IN. For 30 years I was in charge of service to our FM antenna customers. In the last few years, we purchased Andrew Corps line of rigid transmission line and TV antennas. My replacement at ERI is Mark Steapleton who is very knowledgeable about FM transmission systems, including combined systems with the digital audio addition.

Am "trying" to relax these days, but still spend 2 afternoons a week at ERI. At home I've been running a Winlink messaging system since 1993. We are very active in the LA, MS, and AL storm damage.

At any rate, seeing you are also a ham I just had to let you know I enjoyed your presentation and learned a lot.

Take care and hope to maybe catch you on the air sometime.

From: Jim Wagner [jim.wagner at moody.edu](mailto:jim.wagner@moody.edu)

Date: Tue, 13 Sep 2005 14:07:20 -0500

Larry,

I greatly appreciated the information that you presented at the Taste of NAB 2005 in Indianapolis at last evening's SBE meeting. I have already ordered four of the Henry Engineering Superrelays as a result of seeing it on display. It is exactly what I needed to complete the interface in my new studios between the SAS Rubicon consoles and the on-air lights, as well as phone muting.

I would also encourage you to expand your line up of product, including more radio RF and audio. It would also be helpful to have one of your vendors supply plastic "advertising" bags for us to conveniently carry all the CD's and literature that you provide.

Thanks also for the door prizes. I was somewhat excited to hear that I had won a Sundance "Digital" notepad, but then realized that Sundance "Digital" was the name of the company, not some digital type of handheld PAD or PDA or tablet PC. Oh well, the pen was digital :-). It is greatly appreciated.

Joseph really enjoyed the evening. He is 16, and I am home-schooling him. He comes from a very disadvantaged home situation in Chicago. At this point he would have been a high-school dropout in Chicago, and sitting around all day in a rented basement playing video games and watching TV. Joseph helped with the construction of our new studio/transmitter complex and practically did the work of a full-time engineer during this past year. He is also a big help on my little ten acre farm and loves woodworking and mechanics, as well.

Thanks again and keep me on your e-mailing list.

Larry,

Thanks again for bringing the "Taste of NAB" to the Dayton/Cincinnati area again this year. I was not able to go to NAB last year or this year. I wanted to let you know that at your show last year, I had the opportunity to review the Quartz routing switcher you had on display. I was in the market for a routing switcher, so the timing was perfect! Your show gave me a chance to get to know the equipment and meet Steve Olson, a Sales Engineer with the company. If it were not for your show, I may not have pursued following-up with Quartz and ultimately including them in my selection process.

Keep up the good work,

From: James Graham [james.graham at wright.edu](mailto:james.graham@wright.edu)

Date: Thu, 29 Sep 2005 09:43:59 -0400

Dear Mr. Bloomfield,

I wanted to thank you for the opportunity to attend the NAB Road Show at the Harris plant in Mason, OH. This is the second year I have attended and have found the presentation to be valuable to our planning efforts for new purchases. This year the Road Show was very timely, as we are in the process of purchasing new equipment and found a few of the items you presented to be just what we needed. As a direct result of your presentation we purchased 30 Henry Matchbox interfaces and a Leader signal generator.

Also, I wanted to thank you for your willingness to discuss and answer questions we had about Henry and the Leader products when we called you a couple of days after the show. We were looking for an end-user opinion from someone who had experience with several manufacturers' products, not just a company salesman who was trying to hard-sell their products. Though every product has its benefits and deficits your ability to streamline the comparison process and highlight the strengths of these products was instrumental in the purchase decision when time constraints wouldn't allow us to see these differences through demonstration.

Thank you for your insights,

James Graham
Senior Broadcast Engineer
Wright State University

From: Helming, Gary gary.helming@northwestern.com

Date: Tue, 18 Oct 2005 07:50:01 -0600

Larry:

Thanks for the "Taste of NAB" road show. I haven't actually been in Broadcasting since the early 80s, when I worked at a couple of commercial radio stations. I am a telecommunications engineer turned technician for Northwestern Energy (formerly called The Montana Power Co.), the power utility for most of Montana. I am amazed at all of the digital technology, and how easy it makes handling recorded materials. I am glad that my time in radio was involved with the old tape drives and big tape reels and cart machines. Getting that stuff to work right and sound good was a real skill. Nowadays, it all runs itself practically.

Something else of interest to me was a discussion with Dean Lawver of Montana PBS about digital TV. All of us in the FCC world have been bombarded by propaganda that going to DTV will save all of this spectrum, which will go to public safety and be auctioned off to new technology providers. I was shocked to hear that the DTV stations take 6 MHz of bandwidth just like analog TV. I guess you can stack them together tighter than analog TV, without interference, but this big bandwidth savings is just misinformation! I am sure a lot of broadcasters around here are worried that their very significant investment in DTV will turn out to be a good thing. I think many fear that a substantial number of their viewers will just stop viewing local TV when it goes all DTV and will use their satellite systems for everything. That has happened to a goodly extent now, and would be made worse by the conversion to DTV.

At any rate enough of my ramblings. Thanks again for the show--see you next year.

(The following is a letter received today - October 19, 2005 - from Elmo W. Reed of Green Bay, WI by US mail. It is copied here, in its entirety, exactly as received.):

W9VNC
October 5, 2005

Dear Larry:

A note from the Guy that sat on your right last Friday when you presented your program in Green Bay. This is when we had lunch in the old Railroad depot.

I enjoyed your talk and demonstration very much and especially the information as to how we could get some Chief Engineers off their butt and attend our meetings.

I admire your knowledge and presentation of the subject and I know the program was enjoyed by all of those in attendance. It helped too in that you had the equipment there to demonstrate how it works and what it could do in a station.

As I mentioned to you during the lunch hour, I am 88 years old. I started in Radio at WROK in Rockford in 1937 after graduating from RCA Institutes. At that time we only had AM and we had to have a licensed operator at the transmitter during the times the station was on the air. I served 4-1/2 years in World War II and was a LT. with a high powered RADAR nit. After the WAR, I served 15 years at the Newspaper Station in Green Bay. Then became Vice president of Engineering for Post Corporation with 5 TV stations, a number of Radio Stations, four large printing plants and about a dozen Newspapers.

I and the rest of the Guys enjoyed your program and at the same time learned a great deal.

We hope you return some day.

Sincerely,

/s/Elmo

I'm still part owner of a couple of stations.

Subject: Meeting info and Road Show Follow Up....

From: Ince, Charles ChuckInce at ClearChannel.com

Date: Sat, 22 Oct 2005 10:30:28 -0500

I want to extend a very BIG THANK YOU to Larry Bloomfield, Ed Daily, and the Tri-Tech Skills Center, for your contributions to the October 21st 2005 "A Taste of NAB" road show. You guys are Awesome.

And special thanks to all who helped with setting up and tearing down, and helping Larry get packed up.

I think we made a difference, in the way we included "our future replacement engineers", and the student at Tri-Tech. And Including students, I think we had a record attendance for Larry.

Ed has given us an open invitation to ask Larry to return next year. I would like to make this a reality.

Yet, Next year, I hope to be better prepared to represent SBE and our local chapter. Not having been to one of Larry's shows, I really didn't know what to expect and was not prepared.

November 3rd is our next regular scheduled meeting. We will be holding Officers Elections at that meeting. The current positions are:

President-Chair; Dave Hebert
Sec/Treasurer; Chuck Ince
Frequency Coordinator; Neil Bennet
Be ready to vote...

I also want to discuss working with Tri-Tech students and helping those interested in joining our SBE chapter. Possibly even contributing to each of there Dues, from our SBE refund check.

Please be thinking about this.

Ed, you are welcome to join us, and/or any students that may want to attend. Our monthly meetings are held the first Thursday of each month, at 12:00 noon. Currently we meet at Granny's, next to Best Buy, in Kennewick. Anyone interested is welcome.

Thanks again to Everyone,

Charles A. Ince

Hi Larry,
I hope you and your lovely wife had a safe trip home from Tri-Cities!

Thank you so much for allowing me to participate in the 3 Road Show Venues! (Spokane, Pullman, Tri-Cities) You are providing a much needed service for the small market stations and production people. I have had the pleasure of working both the small market communications industry (Eastern Washington, Idaho, Montana, Alaska, etc.) and the larger market (Seattle, Portland, etc) since 1984 and must say I prefer the camaraderie and pace of life in the smaller market! I hope you get enough feedback to encourage you to continue with

your road show events for as long as you can, and I do hope you will allow me to participate again next year!

Keep up the good work! You do an excellent job! After listening and watching you spread the word for the Digital Media Industry it is easy to see why you were voted "Educator of the Year!"

Take Care and good luck with the remaining 2 venues!

Larry,

I just received my SMPTE CD door prize. Thank you very much. I thoroughly enjoyed your Road Show. Several of the products I will keep in mind for my upcoming projects.

Larry,

I just received my SMPTE standards CD today from your show here in Eau Claire, WI.

I just thought that I would let you know that I got it and that it is greatly appreciated. It will prove very useful as we get 'deeper' into DTV and all of the new formats. I learned some new things off the CD today.

I really enjoyed the Road Show presentation and hope that we can get you to come back again. Most of us guys that aren't Chief Engineers never get to go to any of the events that show equipment like you had, so it was very informative.

Keep up the good work.

That was an excellent show! I saw several products that we could use and got some other really good information as well. This is the highlight of the year for SBE meetings in my opinion. Having the equipment running for hands-on is really an asset. I am looking forward to next year's show since I won't be going to NAB.

ps--I put down that I'm not a member of the SBE on the sign up sheet today. If your SBE chapter gets money based on members, you might want to check. I can't remember if I sent them a check this year or not. I'm definitely no longer a certified CBRTE though. During years prior to my 2000 renewal, SBE had night meetings in Portland, so by attending almost all of those, I was able to get the points, but I just can't get to many day meetings. The one time I tried the Sunday 20 meter SBE session, it was worthless. It was just people checking in, and finding out who could hear them.

Larry;

Thanks for the information and I really like the though pattern of education rather than product demo as the motivation for the SBE meeting.

Oh yea I did call Mark and thanked him for the food as well.

Larry-

Thanks for putting on the "Taste of NAB Road Show"!! For those of us out in the sticks who can't make it to NAB, it is great to see what types of things are now out there. I don't know what I would do without your Road Show.

Hi Larry,

Thanks for showing us all the great products at the Road Show. I hope you will be back next year with even more great products.

Thanks,
Carrie Coleman
