Larry,

A sincere thank you for all you've done for our Chapter and for the industry. It's people like you that go out of their way that help to make it the exciting business that it is.

Your "Taste of NAB" is obviously a one of a kind. Indeed, so many of us peons don't get to go to "Lost Wages", or in my case, don't want to. So, even though you're a member, I want to thank you on behalf of the members of Chapter 76 that did avail themselves of your offering, and that includes the wonderful spread you had catered in!

On a totally unrelated subject, I just found out you have some measure of fame in Jerusalem in the form of the Bloomfield Science Center! Check out:

www.mada.org.il/english/index.html

Along with all your other things, when did you have time to get that going???????

I am so sorry for the cancer Carolle and you are facing. I include you because I went through it with my past wife, Carolyn. It places such an incredible burden on the family. My deep condolences. My prayers are with you.

Again, thanks!
John

Hello, Larry
Again, thanks for making the trek to Spokane for the Taste of NAB RS. As before, us radio guys came away with something more than we usually get at trade shows. (I even got a Tech-Notes patch)

Radio has better pictures than TV...it's always exactly what your mind expects to see.

Jerry Olson, CE
Spokane Public Radio

Subject: Thank you for the "Taste of NAB 2006"]
From: kenton [kenton \(at\) landmobile.com](mailto:kenton(at)landmobile.com)
Date: Tue, 19 Sep 2006 14:23:09 -0700
Note: Also received from: Z-Technology & Broadcast Buyer's Guide:

Actually, it is I, who should be thanking you, for making "Larry and The Roadshow" possible. Many of us at SBE chapters do not have the opportunity to attend the NAB every year. I know that those of us here in Eugene are always excited when Larry concludes the annual event, weary as he may be, as he makes his last stop. The old adage, "Last is not least." Really applies, because we benefit from all of the other Chapter presentations he has made and the anecdotal and practical experiences of his prior stops...we really feel we get the best of all possible presentations. Larry is a great teacher and true advocate of SBE and a great spokesman for broadcast technology. Your participation in making his contribution to the industry is appreciated

Kenton E. Sturdevant
Executive Vice President
FOREST INDUSTRIES TELECOMMUNICATIONS.

Thanks for a really great show! They just keep getting better. Fifty venues in five months is an incredible schedule and I admire your energy and commitment. Thanks to your vendors, as well. There will probably be some sales resulting from what we saw of this year's products, some of which nicely fit into some ongoing projects.

Is it possible to win the NAB Educator of the Year two times in a row?

I can't wait for next year's taste...

-- Dick Jenkins: Engineering Shop KEZI-TV Eugene, OR

Date: Fri, 15 Sep 2006 11:54:30 -0500

Hi Larry!

I enjoyed the Taste of NAB show this year as always. For my purposes (as a radio guy) what would be really useful would be if a display could be set up with competing manufacturer's audio processors, all fed from the same audio source, so a side-by-side comparison could be made. Frank Foti had this set up at a Radio Show I went to, and that's what really caught my attention. I suppose it might be a bit too sophisticated of a set up for this venue though. As for printed vs. CD media, both are actually useful, but if I had to pick one, I would still go with printed. The only time I find a CD useful is if it has full product manuals or the like on it.

Take care!

Larry,

A T-shirt would be a great gift. Thanks!

I enjoyed the experience of the meeting. In addition to having a chance to talk with Dennis and Chris outside the WLT meeting, it was great to meet some of the others I recognize by name only. I also learned some technical things that I can build on.

Thanks for the opportunity!

Mary

From: Chuck Reti [chuckr \(at\) mac.com](mailto:chuckr@mac.com)
Date: Mon, 11 Sep 2006 13:37:43 -0400

Larry,

I attended the Detroit stop of your "Taste of NAB" road show on August 16. This morning I received a UPS package containing an ADS Tech "Instant Music" unit. I know I didn't hear my card drawn for a door prize at the time, but this is going to turn out to be a very useful item for

me as I need to ingest some old cassette and vinyl audio. Thanks for including me in your Lucky Winners and hope to see you here again next year.

G'day:

Just a quick note of thanks for yesterday's Taste of NAB road show.

Having attended many NAB's including this year, I wasn't quite sure what to expect from your road show. In a short, it was a terrific experience.

I found the most interesting aspect was the feedback from folks that saw applications for the equipment that I might not have envisioned.

Thanks for your effort, and I look forward to your 2007 road show.

(Also from Jack)

Larry,

We certainly enjoyed having you and the NAB Road Show return to Seattle yesterday for its fourth year. The turnout total of 31 was gratifying considering none of the "Big 3" TV station engineers bothered to join us. That's sad and hopefully we can make some kind of breakthrough to enlist their participation in SBE-16 events like this one in the future. Your program was comprehensive and highly informative. And thanks again for accommodating our last minute program addition with Bob Surette's ppt presentation on HD Spectral Regrowth. I think my colleagues on the SBE-16 board of directors will join me in extending our personal congratulations and gratitude for the considerable time, money, and energy your sponsors and especially you have invested to make the Road Show succeed in over 50 markets spread out in every part of the country. Your dedication and willingness to share to make this event possible is remarkable.

Hi Larry,

I wanted to thank you for doing this show. The attendance shows there is a need. We should talk about how to get L3/narda STS into the line-up. All of the attendees have a need to know their RF environments, and the SRM-3000 can do that. Narda has a full line of RF Safety Products, including survey meters and personal / area exposure meters. I have included a pdf with an overview, and I would like to talk more about this. (*This PDF is available upon request.*)

Larry

Thank you for your time in coming to Bozeman, MT once again. I was there for your 1st on as a student and now working as a producer for small market Helena, MT.

It was great to see all the fun new stuff coming out. Granted most of it was engineering based, there were somethings I was able to take back outside of the engineering field.

Any chance of having more toys for producers in the future? Cameras, decks, new wireless mic technology...

Thanks again for your time and a look at what is out there!

Taken from the SBE Chapter 3 Summer, 2006 newsletter

Twenty-five members and guests met in Wichita at Wichita State University's Media Resource Center, hosted by Chuck Myers, CPBE, CBNT and WSU Chief Television Operator.

DTG and Cobalt sponsored our evening meal, prepared by Sodexho, a part of the WSU Student Center operations. Barbeque beef brisket or chicken, along with slaw, green beans, potato salad, and topped off with a brownie made up the fare. Our thanks to DTG and Cobalt!

Our program, A Taste of NAB 2006, was provided by Larry Bloomfield, assisted by his grandson, who recently graduated from high school. (*Note: Thomas actually has one more year to go.*) Again, I don't know how he manages to do it, but a big vote of thanks is due Larry for the show at WSU June 1. This year was bigger and better than before!

So many of us can not get to NAB, and while I realize this in no way encompasses the scope of the show in Vegas, it does bring so much to us that we would not otherwise be able to hear

about, let alone touch and feel. Most of our SBE programs would do well to fill one table with displays, yet Larry provided us with ten tables of the latest and best of show! His efforts to secure patrons and sponsors for meals and door prizes is an extra effort, and certainly adds to the program. Our thanks to them as well. There was a door prize for each registered attendee at the meeting.

More than two dozen vendors and patrons participated this year and are too numerous to be listed in the space available here, but I urge you to check them out at <http://www.tech-notes.tv>, and then click on "Taste of NAB 2006".

Again, our thanks to Larry Bloomfield and to the vendors and patrons supporting the "road show", it was a spectacular evening!

Subject: RE: Thanks for this year's Road Show

Date: Friday, September 01, 2006 3:19 PM

Dear Larry,

During your presentation yesterday at KSPS, you provided the opportunity for me to speak with some old friends from ESD-101 that I had not seen in over a year. I was Chief Engineer of that facility for 8+ years. I designed and built the facility from the ground up; I still have a lot of ties there. As far as the Road Show, my primary interest was the Real Time Spectrum Analysis from Tektronix. I was hoping you were going to get to that product before we (Paul James and I) had to leave. Unfortunately Paul and I were under a deadline and could not attend the remainder of the presentation. I presume since Paul and I were not present we did not win any of the door prizes. Next year I will attempt make myself available for the entire presentation.

My job here at EchoStar Satellite L.L.C. is primarily Satellite Communications RF. Instead of blasting terrestrial RF in all directions my RF is concentrated and focused sharply at spacecraft orbiting the planet in the Clark Belt, 23 thousand miles above the equator. But, as you say, RF is RF. I am privileged to be the Operations Manager of EchoStar's brand new Earth Station just west of Spokane. Paul James is my supervisor and Senior Engineering Manager for the entire facility. I am sure you are aware that EchoStar is the Dish Network bringing satellite television directly to the home. We have 12 million + customers and growing. My background has been primarily studio engineering and satellite communications.

I had forgotten to leave my personal business card from my small business: SAVITZ BROADCASTING. I am at work so it is not appropriate for me to send it from here. I will send it to you from my home email this weekend. Thank you for your gracious work, preparation and presentation of the Road Show, A Taste of NAB 2006. I hope to see you next year.

Sincerely,

John E. Savitz
Earth Stations Operations Manager

Subject: RE: Thanks for this year's Road Show.

Date: Wednesday, August 30, 2006 10:25 AM

Larry,

Many thanks for a great presentation. I looked forward to this year's show even though I actually got to attend the convention in April. Having people at the local meeting who may have previous experience with the equipment you bring or the problems for which you offer solutions helps me plan for the following year's Capital Request list for KTVQ.

I have only one suggestion: I know you don't want to come off like a sales dude at these gatherings, but I think if you could provide factory list prices or price ranges for the items you show, we would have a good idea whether or not those solutions are what we can afford, or if we should be looking elsewhere.

In particular, I liked the relatively inexpensive USB-equipped test equipment you brought along, like the Sencore analyzers.

Finally, thank you for buying supper for us subjects-of-Andy-Suk. That was totally uncalled for; we had planned to buy YOUR dinner instead!

Many thanks again, and I hope your wife is doing OK.

Subject: Re: Thanks for this year's Road Show

Date: Sunday, August 27, 2006 5:24 AM

Dear Larry:

Many thanks for taking the time and effort in providing the "Taste of NAB Road Show" program at our recent SBE meeting in Appleton/Oshkosh/Green Bay. Clearly a colossal amount of effort goes into organizing and executing these shows across the country. For many broadcast engineers, this is as close to the NAB as they will usually get. As broadcast engineers we appreciate the difference between reading a brochure or visiting a website and actually being able to handle the equipment or get a brief demonstration. It makes a much more lasting impression when you can actually see the gear.

As a radio guy I particularly appreciated the items on display from Telos / Axia / Omnia, Henry Engineering, ESE and Lyle Henry's demonstration of FM Extra. I know I am probably missing a few items too but those are the ones that made the biggest impression this year. I know some of the radio guys get a little bored with the TV / video side but that is their loss. I cannot count the times I have seen a demonstration of a TV side technology that ends up trickling down to radio or is useful to me in some other way.

And of course I would be remiss if I did not thank you and the sponsors for the nice lunch we had at the venue. The main attraction is the technology of course but one way to get the attention of a broadcaster is through their stomach! Thank you very much.

#105
From: Radio Doctor [lylehenry \(at\) fastmail.fm](mailto:lylehenry(at)fastmail.fm)
Subject: About the TASTE of NAB
Date: Thursday, August 24, 2006 8:01 PM

Besides attending TASTE's in Los Angeles in previous years, this year I was there for that one, then was at the TASTE's in Chicago, Milwaukee, and Oshkosh during the past few days while on business in each area where I know various individuals.

I can't help saying what an extraordinary job I think you do with these events. Hearing you at three venues in a row gave me even more appreciation and respect for the work you put into this.

In each location the audience was remarkably different varying from what appeared to be entirely TV production people (Chicago) through a combo of TV and radio engineers

(Milwaukee), to virtually all radio engineers (Oshkosh). And you effectively presented the products and included anecdotes and applications which were specific to the interests of each group.

Thank you so much, and I hope to see you on the road again next year.

P.S. The food was always good, too!

Date: Tue, 22 Aug 2006 09:37:40 -0500

Hi, Larry.

It was good to meet you last night and thanks for all the hard work and efforts to set up the presentation for us.

I, too, was surprised, embarrassed, and disappointed at the ridiculously low turnout. Of course, it is "prime vacation time," but MCAI Chicago, unfortunately, appears to be a dying organization. Nevertheless, we should have had more folks in attendance. And if SMPTE was invited, I guess they didn't hear the call, because I don't think any of them were there. Obviously, if this was to be geared to Corporate/Independent Producers, then you would have needed a different emphasis and a different product mix. (More lighting, cameras, lenses, editing, less transmission/RF.) So I hope attendance can be improved for next year.

I only have two criticisms of the evening itself: First, the session was promoted as starting at 6:00. Perhaps it should have been "social hour 6:00, presentation begins at 7:00" (or whatever). But certainly, an earlier start time would have meant we could have gotten out earlier--or, we would have had more time for questions. Second, I think you were too hard on yourself regarding the "apologies" for the technical/nontechnical group. One comment about that in the beginning would have been fine.

I see you're a Ham. Me, too, (WA9IVH). Since I've worked in Broadcast Production and then Corporate Video Management all my career, I've had a great insight into the fantastic work the manufacturers and Broadcast Engineers have done. Being a ham has been very helpful for my career.

I should have asked last night--do you know John Bredesen? John and I met at Oshkosh, Wisconsin, about 1968, when he was hired as the University's Chief Engineer. Great guy. We haven't seen him in about 2 years. We were in Cannon Beach and Portland last summer. We

were going to visit John and Fran in Eugene, but they were in Europe at the time, so we missed them.

Regards and 73,

Mark Klocksinn

Subject: SBE Chapter 30 Visit / Original Indian Head Test Pattern Here Had Him Holding A Ear Of Corn!

From: Ken Andrysiak [ken \(at\) touchtronics.com](mailto:ken(at)touchtronics.com)

Date: Mon, 21 Aug 2006 13:36:07 -0400

Hi Larry -

It was a terrific 'Road Show' you brought to the area last Thursday night!! How great it would have been to work and learn from you back in the startup days of television and the evolving of radio to the disc jockey / local content days. Your passion and personable approach made for a truly entertaining and informative evening! In a different setting with someone else it might have been nothing more than a hum-drum regurgitation of equipment specs! Not so with you! So thanks again for making the trek to the Midwest where (in some cases) there are fields of corn between the television and radio towers!

One suggestion. Not that you need to carry another piece of equipment but (depending on the venue) it may be helpful to have your own portable wireless microphone system. I was s-o-o-o glad that TPC had one available for your use Thursday! Prior to the use of the wireless, from where I was sitting (other side of the room) I was struggling to hear you. Perhaps some of us older 'engineering-types' are, "deaf in one ear and can't hear out of the other" but I'm not ordering any hearing aids. Yet. Future Road Shows would benefit.

(Note: We do have a wireless mic PA system with us and were told we didn't need it there. We'll not listen next time☺.)

Best Regards & God Bless,

Kenneth Andrysiak

From: [Dan.Caesar \(at\) sbcglobal.net](mailto:Dan.Caesar@sbglobal.net)

Subject: letter of gratitude

Date: Saturday, August 19, 2006 1:23 PM

Thanks Larry for your presentation and test patterns. I won't be back home till Monday and Hal Bresueke said he'll bring them over to my house (*Indian Head Test Pattern set*). I fell asleep many nights at a young lad watching Science Fiction Theater with Truman Bradley and waking up to the test pattern on Chicago channel 9.

I started learning about radio at age six breathing in the white smoke from solder when my father used to repair the Hallifrafters S19R. He worked for Motorola for a time but retired from the Bendix Plant in South Bend.

At age 12 I built a AM radio with three CK722's; And at age 15 I got my ham ticket KN9EUV. I got the General about six months later.

Three days after graduating from high school I was in the Navy and following boot camp I got my radioman's striker patch. I was discharged in 1961 after passing the test for RM second class petty officer. I then got my 1st Class Radio Telephone ticket for no reason at all.

A few months later I was hired to help build a 4-tower array, WGSB radio in Geneva, Illinois. After being a combo operator for a while I left and went to WIXN in Dixon, Illinois, then to WCMR in Elkhart, IN., then in 1971 I was a CBS weekend anchor at WSBT-TV in South Bend. That lasted eight years and I was out when a new news director was hired who later was let go himself. By then I was working for a electronic research and development company and had no desire to get back into broadcasting. Then in 1980 I became an insurance agent.

I would last about three days in a newsroom today after it became apparent that I was a local beat reporter who reported facts not opinions.

The Reporters today have absolutely no idea about historical facts when I comes to the Middle East or for that matter political events after Viet Nam. Sice they all were born afterwards.

I tried to put together to buy a half-million watt shortwave station in South Carolina and later a 50K station in Miami. But those deals fell through and I have settled down for just being a SWL today.

I still have distant hopes that one day I I may run across a run down station somewhere and put myself on the air spinning records and rip and reading the news. ha ha

When you get back home check out my web page <http://ni9y.tripod.com/ni9y.html> which has been there since 1998 because I forgot my password and can't update it.

73's my new friend,
Dan Caesar

Larry:

Thanks for taking the time to visit our area. While I'm not in the profession, I am a ham operator (KA9MXW) and have an innate interest in how things work and why. Local hams were invited to attend your presentation and I am truly glad I took the time to take advantage of your being here. At one time I belonged to a group known as <http://www.tech-assist.org> in order to learn info on older TV's that I was hopeful of restoring. I gave up on that idea because of the large sized cabinets and a little XYL persuasion and now have a small collection of small portable transistor TV's of the late 60's and 70's--they take up substantially less space.

I did call Dan Caesar (NI9Y), the winner of the artwork and was impressed that you also contacted him--he'll get the artwork on his return from vacation. After looking at the artwork I connected with the Pharis-video site and am going to order the basic test pattern version to frame and display in the bedroom where I have my small TV's.

Getting down to the business end of things, our court has a large appetite for data storage. The holographic burner and its projected future are very interesting. I plan to share the CD on the device with the designer of our court case management system (<http://gawquest.com>) which is an Indianapolis area firm whose case management program is used by the larger juvenile courts in Indiana and also by juvenile courts in several other states.

I will also pass info on to my nephew who was involved in management at Captiva Corp. (<http://www.captivasoftware.com>) until recent buy out by EMC2--like many in his field I think he'll be able to retire early.

Best of luck with your road show and again thanks for visiting the South Bend area.

From: Chuck Reti [chuckr \(at\) mac.com](mailto:chuckr@mac.com)

Date: Fri, 18 Aug 2006 22:36:20 -0400

Larry,

Thanks to you as well for your hard work in putting on this show. This was the first one of your "Tastes" I'd been to. I was expecting a room full of card tables and equipment vendors (Sales Guys from the Dark Side), a mini-expo of some sort. I was pleasantly surprised to find that this event is you and your presentation of the best and most interesting things that you've chosen from the NAB show. Nice to have some "filtering" done of that mountain of information, especially for the growing number of us who for many reasons can't make the pilgrimage to Vegas.

Only minor criticism-

Seeing a server or generator but not its output or interface, or a monitor or test instrument without a signal to see or measure is OK for basic information, but some of the gear was just sitting in a rack, just "bricks." Curious if different facilities provide you with signals or other hookups or was this pretty much the standard setup.

(Chuck was answered. We have as much equipment on the Road Show interfaced with as many of the various sponsor's equipment as is practical, considering our situation.)

You were talking about Chuck Pharis' online museum. Chris Hill and I, as we told you, were in contact with Chuck in January, and hoped to get with him when he was here in Detroit doing Super Bowl XL for ABC. As a fellow old timer, you might find my photos of the long-decommissioned Detroit Public Schools facility interesting.

Date: Thu, 17 Aug 2006 10:39:40 -0400

Hi Larry,

I just wanted to once again congratulate you on the great job you did at the Detroit Taste of NAB road show yesterday. I believe the people who attended were truly appreciative of your efforts and impressed as well with your command of all the various technologies that were on display.

I don't know how you can make all of this happen on such a hectic schedule.

On a different topic entirely, I was perusing your site and found a page entitled A Brief History of Film and Digital Cinema. I noticed a number of technical firsts that haven't yet made it onto the timeline and that might be of interest to those watching the development of digital cinema mastering technology. This is an area that I have been very intrigued with over the last 5 years and if you would like, I would enjoy discussing this with you if you are interested and when it is convenient.

Thanks again for your hard work.

Date: Friday, August 04, 2006 8:08 AM

Mr. Bloomfield:

Thank you for coming to our NYC area and presenting us with an enjoyable night of equipment and technical fellowship! Even though I am more of a radio technician, I really appreciated the Tour! You are a great teacher and you have great knowledge for all of the equipment that you presented. It was actually quite refreshing seeing all of the video equipment. It was a nice change of pace from the usual stuff I have to look at and deal with, but more importantly it opened up my eyes to a whole new array of products and manufacturers that I might not have considered in the past. Because of the changes that have been taking place over the past decade, I have been getting more and more involved with video projects and wouldn't be surprised to find myself working in some kind of a video broadcast environment at some point. Your program can greatly help me by keeping me informed about the different systems available!

Anyway, thanks again for coming to New York Tri-State area and presenting to us. I am looking forward to next year's tour!

Thanks again Larry!

Best Regards, -Russ Skadl

From: Thomas G. Osenkowsky [tosenkowsky \(at\) prodigy.net](mailto:tosenkowsky@prodigy.net)
Date: Thu, 3 Aug 2006 18:18:54 -0400

Larry,

Your presentation at SBE Chapter 14 was a pleasure and an education! Although I attended NAB 2006 I did not have the opportunity to experience in detail the products you showcased last evening. Even though I have used and recommended some of the products from a certain vendor, you showed other offerings, some of which I was unaware of.

As you may know, my practice is mainly in the RF end of radio broadcasting. I do, however, have three University stations I provide contract engineering services for. Two of these major Universities offer intensive Communication curriculums with a major component being television and video production and post production. I found the demonstration of these products to be very valuable and took literature to pass along to the appropriate Department Chairpersons.

I look forward to next year's Taste of NAB! On a personal note, my best wishes to your wife in her time of need.

Tom Osenkowsky

From: Sunset Wake [sunwake \(at\) optonline.net](mailto:sunwake@optonline.net)
Date: Tue, 01 Aug 2006 13:09:00 -0400

Larry, (KA6UTC)

Thanks again for the great presentation last night. It was well done and informative. I hope we get to have you do it again. Even the radio guys that were with me said it was good seeing some of the TV stuff. That's something they wouldn't do at NAB in Vegas. That show is so huge it's impossible to see everything. The tendency sometimes is to stick to areas that concern you the most. When I was with HBO they encouraged you to look at other things to try and gain as much knowledge as possible.

I told you I was with HBO for 21 years and I managed the RF uplink of their communications center in Hauppauge New York. I have M.S. and my neurologist told me to stop working or suffer the consequences because I was getting worse. You know the kind of stress that kind of position has and my health was just deteriorating. But I didn't want to look at it as being the end of my career in broadcasting. To me it was just a little side step. My companies Sunset Wake/Sound Engineering let me stay involved with TV and radio and but take it easy too. I only handle the occasional small job now and have sort of made this my hobby too. That keeps my neurologist happy. As you pointed out keeping current is very important. Unfortunately, due to finances, my friends and myself can't afford to go to NAB every year. We try to do it every other year. Presentations at our local SBE chapter 15 and shows like yours fill in the gaps between the years we can't attend NAB. That's why your road show is so important to people like us. Keep up the good work.

BTW, I am still vice president of HBO's Ammeter Radio Club. They wont let me give up the position even though I don't work there anymore. If you hear WB2HBO on Field Day that's us. They let us set up at the end of the sidewalk in front of the communications center every year. You can see pictures of our last Field Day on my web site at:

<http://www.wa2fnq.com/hbofd06/hbofd06.htm>

In fact take a look around my site: <http://www.wa2fnq.com>

Maybe run into you on the air. Hope to see your road show again !!

Subject: SBE15 Road Show

From: Jeff Smith [jsmith \(at\) nassaubroadcasting.com](mailto:jsmith@nassaubroadcasting.com)

Date: Tue, 1 Aug 2006 10:18:28 -0400

Larry,

Thanks for brining the Road Show to SBE 15! I really enjoyed you presentation last night.

The only thing that would have made it better, in my opinion, would have been more radio gear. I know that may not be practical or even possible but in areas that have both SBE and SMPTE chapters the SBE tends to attract more radio guys.

With that said... I appreciate what you are doing bring vendors to the engineers that may not otherwise have an opportunity to see them.

Good luck and safe travels.

Jeff

Oh yeah... shameless plug here... I am running for the SBE BOD and any consideration you could give me would be appreciated.

Date: Tue, 01 Aug 2006 09:35:26 -0400

Larry,

Thank you for brining the Taste of NAB roadshow to the New York City area last night. I enjoyed attending, and found it interesting.

My one suggestion would be if there is some way to allow more time for one-on-one discussion between the attendees and vendors. By the time that the presentation was complete, there really wasn't too much time available to chat with the vendor reps. Other than this one point, I think the event was well organized and useful.

I hope that the roadshow will be able to return to the New York City area again next year. I will look forward to attending,

Regards,

From: Dave Overstreet [daveo121 \(at\) charter.net](mailto:daveo121@charter.net)
Date: Thu, 27 Jul 2006 00:23:34 -0400

Hello, Larry,

Thanks for your "note", but it is We who should be thanking You, for all the effort and time that you invest to bring this show to us. Most of us at the "staff engineer" levels never get to the NAB Convention in Vegas, due to costs and not being able to desert our stations for that long, so it's especially enjoyable and beneficial for us to be able to attend your Road Show. In case we didn't say it with enough emphasis at the show, we greatly appreciate everything that you and the sponsors and vendors do for us.

I personally have been retired for about 5 years, having had to "leave early" on emphysema disability, but I still maintain contact with my former work-mates, and local SBE programs and your superb Taste of NAB show help me to be able to better communicate with them, and occasionally even help them "dope out" a challenge.

Again, thank you for bringing this program to us.

Sincerely,
Dave Overstreet

Larry -

I wanted to send a quick note thanking you again for your Taste of NAB Road Show that you put on last night.

Although I am allowed to attend the NAB convention, I have to pay my own way. Since I couldn't afford to go this year, getting to see some of the interesting equipment that you brought to your presentation was a great help. I really liked hearing about the equipment in your no-pressure, informative, straight-forward way. When I go to the NAB convention, there's the miles of walking, the crowds, and the vendors who only extol the virtues of their equipment and don't let you get your hands on it. Being able to walk right up to the equipment, pick it up and see what it does is really great.

I hope that you will come around again next year, and bring even more equipment!

Thanks again for the great presentation!

Mark

Hi Larry,

I enjoyed your Taste of NAB Road Show at the Knoxville SBE chapter meeting. Even though I got to go to NAB, I still came away with a lot of useful information from your program. Thanks for doing the show and I hope to see you next year! Oh, by the way, thanks for the SMPTE Standards disk. Now I can reference what I've been doing wrong!

Best Regards,

Tom Theilmann

Date: Mon, 24 Jul 2006 08:58:50 -0400

Larry,

I just wanted to send you a word of thanks for bringing the Taste of NAB program to Charlotte last week. I thought the program was great . I work as a one-man shop, and simply can't get out west for the NAB, so having the opportunity to see and touch the exhibits is really invaluable.

I also appreciate the amount of work it takes to bring the exhibits in, set them up, pack them up and move them out to the next venue. The people who assist you should also be thanked.

Thanks for your continued dedication !

Lane

From: acdc [acdc.2001 \(at\) knology.net](mailto:acdc.2001@knology.net)
Date: Sun, 23 Jul 2006 21:03:54 -0400

Thanks Larry,

This was my first "Taste of NAB" and I look forward to others. I learned a great deal from your presentation, but also realized I have a lot yet to learn. I most enjoyed your "tongue in cheek" humor and forthright honesty in speaking your mind. It seems to be a talent Americans have lost in their brainwashing "be politically correct" atmosphere we live in. I also enjoyed seeing the wonderful SCETV facilities for the first time. I can see by the volume of equipment you haul and set up what a personal effort that is for you. All said and done, I enjoyed myself, learn a lot and look forward to the next time. Thanks for your hard work and efforts, it is appreciated!!

Respectfully,

Dallas Swindal P.E. - KZ4Z last of the 2x1 in the 4 call area!!

Larry

Again thanks for bringing the show back to Columbia. I'm retired from ETV now for 5 years, but still work part time. Mostly when we have transmitter troubles on the ole stuff.

Believe me when I say that Tara is really the back bone of the engineering dept. With out her, nothing would get done.

I hope to see you again next year. And I do get the Tech-Notes and have for a long time.

Dear Larry:

I just wanted to thank you and the sponsors who make the NAB Road Show possible. Without all of you, this could never be achieved. I just wish that your sponsors could be the proverbial "fly on the wall" to see and hear your presentation. You do a terrific job of exposing the audience to the benefits of each of the sponsors' products. The information you provide would be almost impossible to accomplish with advertising alone!

I look forward to seeing you and your grandson each year!

Sincerely,

Date: Tue, 18 Jul 2006 20:20:05 -0400
CC: Hap Griffin [hgriffin \(at\) scetv.org](mailto:hgriffin(at)scetv.org)

Thanks for the excellent Presentation at A Taste of NAB Today, 7/18/06 SCETV Studios in Columbia, S.C.! I know that the presentations are a lot of work and effort for you and your sponsors and really do appreciate them. This year was even better than last year, (except I won a prize last year and not this year), seriously, however I still won with the excellent

presentations that are always at your events. As you say NAB is a must see exposition in our industry but do not always have the resources or the time and even if I had gone would have still been time well spent even traveling a great distance to see it. Being the experienced broadcast engineer that you are is always great to learn from you when you relate your past experiences and recommendations for the equipment demonstrated at A Taste of NAB and am a supportive fellow member of SBE and a amateur radio operator. I am already looking forward to seeing and experiencing the new stuff and improvements on the old stuff and listening to your experiences and recommendations. Thanks to your for the excellent presentation and also to Hap Griffin, P.E. Vice President of Engineering at SCETV for hosting the event.

Larry:

Many thanks for including Knoxville in your trips with the NAB road show. A great concept and idea.

Your presentation was very good and much appreciated by those of us who didn't make it to the NAB this year. I hope you can get more radio equipment to show next year. While most of the SBE members are in TV about 1/3rd are in radio and there were only a few things of interest to those folks.

Thank you and your sponsors for the lunch too. It is always good to get together with the guys and see everyone. Because of my heavy travel schedule I generally don't get to make but one SBE meeting a year. It was good to see so many of the locals at your presentation...that says a lot for you.

Thanks again Larry. Hope you make it back this way again. Maybe see you on ham radio one day too.

Kindest,

Larry Perry (the one in the black suit!)

Larry,

It was a pleasure (as always) to attend the Road Show. For those of us who never get to attend the NAB show, it's our only exposure to the new technology that's coming down the pike. It's important to those of us who have to solve problems daily to know what tools are available to solve those problems; your Road Show addresses that need admirably.

By the way, I'd like to express my wishes for your wife's recovery. She must be a rare gem, indeed, to have stuck with you all these years in our crazy business. Being blessed with such a gem myself (who has stuck with me for twenty-eight years as of tomorrow, twenty-seven of those in television), I know whereof I speak.

God speed and continued success.

Date: Mon, 10 Jul 2006 13:23:38 -0400

Hi Larry, let me thank you for your efforts in bringing the NAB Road Show to Miami. Your presentation is always our biggest meeting of the year and I know from comments made by the attendees that they truly appreciate the work that you do and your effort. If you didn't do the road show, many of us would not get a chance to look at and play with the new technologies that are shown at NAB every year, as many of us do not get a chance to attend NAB. Please pass on our thanks to your sponsors, without their sponsorship we would miss out on a great amount of the new technology that they are producing. Finally I would like to pass on to your Patrons a special chapter thanks for the food they supplied. As you could see by the end of the

meeting the guys had consumed almost all of it. This was a great meeting and I'm looking forward to next year.

Date: Sat, 1 Jul 2006 08:47:56 -0400

And thank you, Larry, for your devotion to bringing the latest and greatest to us who aren't able to get to NAB. It's obviously a great challenge, but even more obviously a labor of love.

I believe you may have heard that this was the first time I'd seen Bob Hardie in over 30 years. He replaced me as I left the Chief Engineer position at WLFI-TV, Channel 18, in Lafayette, Indiana, in 1971. He's done, and is obviously doing, a great work there at WTTA and with Chapter 39.

Please pass on my personal appreciation to all your sponsors and other supporting companies. I know you couldn't do this without them no matter how passionate you may be about what you are doing. A special thanks to Clark Wire and Cable for the gift certificate which I was fortunate to win.

This was the second "Taste of NAB" presentation I've attended, the first being with Chapter 25 in Indianapolis a couple of years ago. I learned much there as I did with this one. And, I know I'll make every effort to attend in the future.

God bless!

Subject: Re: The Larry Bloomfield Roadshow

Date: Friday, June 30, 2006 7:56 AM

Larry,

I want to thank you for bringing your roadshow to Tampa again this year. As usual, it was a very good show and everyone I talked to about it was very pleased and learned a lot. You do a very good job of explaining and describing the equipment and how it's used.

Next year I will not be Chairman as I am in my second term and two are all that is allowed. However, I will most likely be in a position to advise and I will be advising that we do all that we can to have the show along with whatever it takes to get people to attend. It just may well be that a noon show would work out better. We will talk with you about that next year.

Thank you again. You are a professional and a wonderful person as well. I'm looking forward to a long and enjoyable association. Bob

PS... On the way home last night I found myself looking back over the evening and realized that I took motions and forgot to take a vote on the motions..... when I realized what I had done, I laughed at myself all the way home. I can't believe I did that. Like Kermit the frog says, "it's tough being old" or was it green? HI HI

Date: Thu, 29 Jun 2006 15:45:01 -0700

Larry,

Just now getting to respond. My son and I really enjoyed your presentation in Jackson, Mississippi. We are in the LPTV business and I have had to learn TV engineering by the seat of my pants. No formal training, but I manage to keep 3 LPTV transmitters on the air 24 hrs a day.

The thing I was most impressed with was the Streambox. We are looking for a way to telecast live events on our LPTV network. High School and College Sports are what we want to do live and we can not afford the satellite cost. I wish I could have seen the Streambox in action. We have talked with a rep from time to time but they have not allowed us to test one yet. Every dollar counts for us and we really can not take a chance and purchase before we demo a unit like the Streambox.

Hope to catch you next year. It was great!

Your wife is in my prayers. I hope everything works out for her.

Thanks,

David Ellington
Ellington Broadcasting

PS: I forgot to ask. I am in the market for a low cost logo generator to put our logo ID on the screen. If you run across one, let me know.

CC: Larry Wilkins (*SBE Chapter Chair*) [larry.wilkins \(at\) cumulus.com](mailto:larry.wilkins@cumulus.com)

Larry,

I just wanted to thank you for your efforts in presenting the Taste of the NAB Road Show to the folks in Montgomery and the surrounding area this past Friday. Many small and medium market broadcasters (especially the engineering types) do not get an opportunity to attend the NAB. This program provides a valuable service to those people. I certainly hope the road show sponsors realize that this is a big benefit for many who would otherwise not have any exposure to many of the products that you display and provide insight into their operation.

Thanks and Regards,

Date: Mon, 26 Jun 2006 09:01:58 -0500

Larry,

I know it is a lot of work to put on such a show and I wanted to say thanks again to you and your sponsors for all your hard work.

I appreciate your taking time to answer my questions.

I would have helped you load up but I had another trailer to load up and deliver for ARRL 2006 field day and had to get out to the site where they were waiting on me. I hope you got in on the action some how. We had a good Icom D-Star digital repeater demo on Saturday. We need to figure out how to get analog audio out of the controller to link this new digital system to our regular repeater.

I hope your travels go well,

Wiely Boswell

Larry:
Didn't get to talk to you much, and I had to leave before the end, but wanted to thank you for the great NAB showcase event. We are a Louisiana based audio/video sales/support/integrator in Louisiana/Arkansas/Mississippi/Tennessee and would be happy to work with any of your valuable contacts in those states.

I cover the New Orleans/So. La. area with contacts including broadcast, education, ministry, government, and post production.

Hope you have a safe and profitable journey....look forward to seeing you back down here and at NAB. Please contact me for any industry related inquiries or commentary....

Date: Tue, 20 Jun 2006 08:05:38 -0700 (PDT)

Larry,
You provide an excellent opportunity for those that have a real interest in our "trade" to gather and learn.

Even tho I went to the "show" there is never enough time at any of the booths to have a slow look and in depth conversation. And I would hope that those that attended, (saw a number of new faces) were enlightened.

Your items on display are valuable to many of my clients, and have recommended them in many occasions.

All the best to you and your "Grandson" (have 3 myself), hope your truck gets repaired to your satisfaction, and the remainder of your trip to be without those difficulties.

And lastly, will remember Mrs. Bloomfield nightly.

Mr. Bloomfield,

Thank you for bringing the Road Show to San Antonio, Although I stayed for the entire presentation, I was under the impression that it was a luncheon function and told my boss I would be gone for an hour and a half. I was out of office for 3 and a half hours. Fortunately, I have an understanding boss.

Anyhoo, it is so nice to have a venue like yours to come to San Antonio, we usually have to travel to Austin or Houston to view the products you had at the show yesterday. While I did

attend NAB, I did not have time to see all of the products there...your show gave me a little time to see some things I did not get to see at NAB.

I also got to meet Joel from CVS again, and made a new sales contact for future quotes and purchasing. So, your show was a definite benefit to me!

Thank you for the Clark wire gift certificate, the patch, and the jumpdrive. Please keep me on your list for future events!

SOCIETY OF BROADCAST ENGINEERS · San Francisco Bay Area · Chapter 40

Mr. Larry Bloomfield
Tech-Notes
1980 Twenty-fifth Street
Florence, Oregon 97439

Dear Larry:

Thank you for bringing your "Taste of NAB" road show to a special May 15 joint meeting of SBE Chapter 40 and the Bay Area Broadcast Engineers Society (BABES), held at the KTVU studios in Oakland. As you can see from the attached meeting sign-up sheet, we had a good attendance of 28 persons.

I am sorry that I couldn't make that meeting personally, but Chapter Chair Art Lebermann reports that (and as usual) you had lots of interesting stuff. And, I see from the sign-up sheet that Victoria Battison, daughter of SBE member #1, John Battison, was there. Wow.

I hope that all is well with you.

Sincerely,

(signed)

From: Richard W Abraham [rabraham2 \(at\) cox.net](mailto:rabraham2(at)cox.net)

Date: Fri, 2 Jun 2006 11:05:00 -0500

Fantastic!

Larry, I don't know how you do it, but I want to say thanks for the show at SBE Chapter 3, June 1 at WSU in Wichita, KS. This year was bigger and better than before!

So many of us can not get to NAB, and while I realize this in no way encompasses the scope of the show in Vegas, it does bring so much to us that we would not otherwise be able to hear about, let alone touch and feel. Most of our SBE programs would do well to fill one table with displays, yet you provided us with ten tables of the latest and best of show!

Your efforts to secure patrons and sponsors for meals and door prizes is an extra effort, and certainly adds to the program. Please extend our thanks to them as well. And lastly, our thanks to you for your constant efforts in boosting SBE.

Date: Tue, 23 May 2006 18:50:48 EDT

Hi Larry,

I was at the presentation last week in Napa and promised you I would send you a note re: Language.

I think that one of the most important things for engineers to learn is to discover how to talk to producers and directors (and vice versa). While at the seminar I was faced with this very problem. I was talking to one of the engineers and even though we were saying the exact same thing in two different "languages" we each thought the other was wrong! I believe it is important that engineers realize that PDs come from an entirely different background and education. It's not always the jargon that we want to hear but rather; "can we do this or not?"

Engineers are the ultimate behind the scenes combatants and strive for recognition in an ego heavy profession. By spewing elevated jargon to a PD most engineers find themselves almost on the outside looking in. PDs are just human beings and we make plenty technical and creative mistakes. Having an engineer that is supportive and speaks everyday language is a blessing that PDs crave and will acknowledge. Thanks again for the seminar. It's always valuable for me to attend these types of seminars to discover what the guys that make it all work are all about. Thanks for paving the road! Best, Garry

Garry L. Newkirk

Thank you so much for sharing your considerable knowledge and van-full of equipment with those of us in the Broadcast Television Engineering Technology program. I found any editorial comments you made valuable since they are from the perspective of an experienced broadcast engineer, so they help me in developing a perspective on various technologies and directions equipment design is taking. I also appreciated your stories about your experiences, including how your career got started and your views on how we student engineers should approach the work world when we graduate. I do agree that just showing us the equipment without providing us the background would have been less successful, and that much better was your approach of showing less but attempting to provide the background knowledge for us

to be able to understand the products shown. Mostly you provided enough background knowledge; sometimes an acronym slipped in that was unknown to most of the students.

Also, thanks very much for the email you composed and sent out to all of the companies whose products you discuss/present in the road show, mentioning that our minimally-funded program sure could use a few donations here and there. Sony has seemed to see the wisdom of providing the program with equipment so that students will know they can choose reliable and familiar Sony equipment when it comes time for them to have input into purchasing decisions; I hope other manufacturers can see that as well. I hope that helps in us getting some more donations.

I hope to see you and your presentation next year at NVC.

Subject: Taste of NAB (*Reno*)
From: J. C. Cooper [videoengr \(at\) sbcglobal.net](mailto:videoengr@sbglobal.net)
Date: Sun, 14 May 2006 15:07:13 -0700

Larry,

Thanks again for presenting the Taste of NAB Roadshow in Reno last week. Although I have been in the industry for many years and would like to think that I keep up with technology and manufacturer's products, I was pleasantly surprised by the amount of new information you brought to the presentation. I certainly would recommend anybody in the television or radio broadcasting business attend.

The products you showed by Henry Engineering and InPhase technologies had to date completely escaped my notice. The Henry products in particular were of great interest, duplicating capabilities that I have several times messed around with for days in the shop. If I had known about them I could have saved a lot of time and aggravation.

The InPhase recording technology was also of great interest given the ever increasing need to store television programming. I certainly will be watching this company as a potential for replacing my current recording technology in the future.

Best regards,

J. Carl Cooper

Larry,
Hello. Thank you for the presentation today. It was very informative and upbeat (in a geeky-techno way) as well!
I will look into writing a paper on SF radio, and see how it goes. Thanks for the suggestion.
Take care!
Terry
(Note: Terry is a student at Napa Valley Community College)

Thank you for a pleasant day and renewing my interest in tv and electronics in general. I liked your describing the various items of equipment available to the present day techs. My brush with TV included TV repair and setting up closed circuit TV on two ships. As I said my knowledge at the time was very limited, but somehow we got the job done and the ships cable TV worked just fine.

I also had to insure the Flight Deck TV Recorder was in working order. I'll never forget that the recorder required a vacuum to hold the tape on the recording drum.

While I have played with spectrum analyzers in labs, most of the spectrum analyzers I used were for recording power quality at the 60 Hertz level. When I was in the field, there were a number of analyzers complete with report writers that became available. Before that, I used a Fluke scope and the associated harmonic analysis software. This all beat using the Numerical Method which requires taking the wave and dividing it into 36 parts and entering the amplitudes into spread sheet.

I also appreciated your pointing out the fact that an rf transmitter is still an rf transmitter and the principles should be well understood by the students.

With respect to power quality in an electronic situation, the IEEE Green Book and the IEEE Emerald book are a good references to have in any broadcasting station.

Another item that has surfaced on a couple times was the complete misunderstanding of the term isolated ground receptacle. A isolated ground receptacle as you probable know requires a power conductor, neutral, equipment ground conductor and a receptacle ground which ties back to the neutral bus.

While I do not have much use for my old Fluke 97 scope, I still keep it for sentimental reasons.

Once again thanks for an enjoyable and stimulating day
